Microbial and Emerging Technologies as Alternatives to Enhance Processes in a Sustainable Food Supply Chain

Guest Editors:

Dr. Wilson Jose Fernandes Lemos Junior

Department of Biology, University of Padova, Padova, Italy

Prof. Dr. Leandro Cappato

Instituto Federal de Educação, Ciência e Tecnologia Goiano Campus Rio Verde, Rio Verde, Brazil

Deadline for manuscript submissions:

25 November 2024

Message from the Guest Editors

This Special Issue delves into the utilization of microbial technologies and alternative methods as emerging technologies that can enhance food processing within sustainable food supply chains. It emphasizes the integration of innovative techniques to advance practices in food and fermented food production, aligning with the sustainable development goals of the food sector.

This publication seeks to highlight the synergy between advanced microbiology techniques, omics technologies, and other emerging technologies to discover new solutions and methods for sustainable food and fermented food production. Additionally, this Special Issue will explore the genetic and phenotypic characteristics of microorganisms, particularly bacteria and yeasts, as well as new technologies that can impact the safety and quality of food, promising significant technological advancements in sustainable food systems.

We aim to update and discuss results from culturing, predictive models, technology comparisons, genomics, transcriptomics, metagenomics, and metatranscriptomics. And we hope to contribute new trends to be considered in the implementation of sustainability in food industry supply chains.

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
