Detection, Risk Identification and Control of Foodborne Pathogenic Microorganisms

Guest Editor:

Dr. Yingwang Ye

School of Food and Biological Engineering, Hefei University of Technology, Hefei, China

Deadline for manuscript submissions:

27 November 2024

Message from the Guest Editor

Contamination and infections from foodborne pathogenic microorganisms pose an enormous threat to food production and global public health. The accurate and rapid detection of pathogenic microorganisms early on is not only significant for public health, but also for food safety, environmental monitoring and clinical diagnosis. Traditional methods include complicated pretreatments and decoding analysis procedures, which are cumbersome and time-consuming. Considering the limitations of traditional technology, it is important to develop alternative novel methods to rapidly and precisely detect pathogenic bacteria to ensure food safety. In addition, with the excessive use of antibiotics and toxic fungal contamination, bacterial resistance and toxins from fungi have become major challenges in public health and food safety. Developing new bacterial prevention and control technologies is significant to ensure food safety and can contribute to the sustainable and healthy development of the food industry.

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
