Message from the Guest Editors

Dear Colleagues,

Cereals are the predominant ingredient in the manufacturing staple foods. The exploitation of cereals-based food of high quality and nutrition are pivotal for the national health. The majority of refined cereal products have low nutritional value since they are constituted of high levels of carbohydrates and fat. The balance between the quality and nutrition of cereal-based food should be comprehensively considered by incorporating the functional cereal ingredient as well as introducing the innovative processing technique. Moreover, understanding the interactions of multiple cereal components at the molecular level during processing and digestion significantly advances the developing principle of cereal-based foods and allows for regulating the quality and nutrition of cereal-based foods.

Thus, the aim of the current Special Issue is to collect recent advances on the quality and nutrition of cereal-based foods. Original manuscripts, including full-length articles, short communications, and mini-reviews, are all welcome. All manuscripts will be peer-reviewed before their acceptance for publication.

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
