2. Think Healthy Group, Inc., USA

Dr. M. Monica Giusti

Department of Food Science and Technology, The Ohio State University, Columbus, OH 43210, USA

Deadline for manuscript submissions:

closed (30 June 2019)

Message from the Guest Editors

Anthocyanins are outstanding compounds that by their aglycone parts (i.e., anthocyanidins) are involved in a series of chemical reactions, which are particularly dependent on pH and give rise to secondary structures. These forms have different chemical and possibly nutraceutical properties. Anthocyanins are of particular interest to the food industry because of their ability to impart vibrant colors to a variety of food products, serving as value-added ingredients. Food scientists have successfully used anthocyanins as an alternative to artificial dyes and lakes in numerous applications. The use of these compounds in “functional food” products that are commonly consumed offers another strategy to help increase the population’s intake of these dietary bioactive compounds.

Your publication is welcomed to this Special Issue of Foods. The final deadline for manuscript submission is 30 April 2019. All articles will be peer-reviewed, and the articles received before the deadline will be immediately processed.

Keywords: Anthocyanin; Food; Color additive; Food ingredient; Characterization; Quantification; Stability; Shelf life

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
