Biotechnological Re-cycling of Food By-Products

Guest Editors:

Prof. Dr. Byung-Soo Chun

Department of Food Science and Technology, Pukyong National University, Busan, Korea

Dr. Adane Tilahun Getachew

Research Group for Bioactives – Analysis and Analysis, National Food Institute, Technical University of Denmark, Kemitorvet Building 204, 2800 Kgs Lyngby, Denmark

Dr. Monjurul Hag

Department of Fisheries and Marine Bioscience, Jashore University of Science and Technology, Jashore, Bangladesh

Deadline for manuscript submissions:

closed (5 September 2022)

Message from the Guest Editors

Millions of tonnes of food wastes and by-products are generated worldwide which costs a lot. Additionally, disposal and dumping of this biomass are not only expensive from the economic point of view but also an environmental concern. From this point of view, efficient management of food by-products possesses economic and environmental importance. In addition, food by-products are nutritionally rich with various bioactives and are feasible to utilize in human and animal feed by proper recycling approach. At present, the advancement of science and technology assure the prospects of food byproducts for valued utilization in food, pharmaceuticals, and cosmetics. Biotechnological approaches interestingly and extensively investigated for the better utilization of biomass for human welfare. The initiative of aggregating modern knowledge in biotechnological application in re-cycling food by-products will open a new horizon among interested scientists, food processors, and consumers

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, Foods has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
