Research on Sustainable Food Packaging Technology

Guest Editors:

Dr. Araceli García

Organic Chemistry Department,
University of Córdoba, Campus
de Rabanales, Edificio Marie
Curie (C-3), Crta Nnal IV, Km 396,
E-14014 Córdoba, Spain

Dr. Eduardo Espinosa Víctor

Chemical Engineering
Department, Faculty of Science,
Universidad de Córdoba,
Building Marie-Curie, Campus of
Rabanales, 14014 Córdoba, Spain

Deadline for manuscript
submissions:

29 November 2024

Message from the Guest Editors

Food industries have a great global economic impact, producing large quantities and varieties of products, but often with recurring food safety problems due to normal deterioration or attack of the environment (microorganisms, insects, traces of chemicals). The security and reduction of postharvest losses (fruits and vegetables) and degradation along supply channels becomes a key challenge for society and the economy. In this regard, this Special Issue seeks to disseminate to scientific society and industrial stakeholders new innovative technologies in the development of food packaging that ensure the durability of food, and even offer smart packaging with active properties that improve the appearance and presentation of food. Thus, the application of innovative technologies in the production of sustainable food packaging, the use of bio-based materials of renewable origin or with improved properties, or the design of new additives used during food storage are common topics considered in this Special Issue, remaining open to other lines of research associated with improving the durability and economic/logistics of the food supply chain.

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
