## Advances in Biosensors for Food Safety Control and Management

Guest Editors:

**Dr. Maria Fátima Sá Barroso**

REQUIMTE-LAQV, School of Engineering, Polytechnic Institute of Porto, R. Dr. António Bernardino de Almeida 431, 4200-072 Porto, Portugal

**Dr. Hendrikus Petrus Antonius Nouws**

REQUIMTE/LAQV, Instituto Superior de Engenharia do Porto, Instituto Politécnico do Porto, Rua Dr. António Bernardino de Almeida 431, 4249-015 Porto, Portugal

Deadline for manuscript submissions:  
**closed (15 November 2023)**

### Message from the Guest Editors

Food safety is critical for nutrition, health, and overall quality of life. As a result, there is an increasing demand for food safety and quality control. Biosensors can be specifically designed for this purpose because they have the potential to enable low-cost, time-effective, fast, precise, and accurate measurements. Biosensors are generally highly selective, offering several options for onsite and real-time food safety assessment. Additionally, to increase their sensitivity, transducer surfaces can be modified with several materials, such as metallic- and/or carbon-based nanoparticles and magnetic materials. To broaden the use of biosensors, advancements in transducer materials, equipment, and software, as well as multiplexed analysis, are necessary.

Several biosensors have been developed to assess common food contaminants, such as (illegal) additives, pesticides, antibiotics, pathogens, toxins, and drugs. Therefore, biosensors are expected to play an increasingly essential role in food safety control and management.

## Editor-in-Chief

### Prof. Dr. Arun K. Bhunia

1. Department of Food Science,  
Purdue University, West  
Lafayette, IN, USA

2. Department of Comparative  
Pathobiology (Courtesy), Purdue  
University, West Lafayette, IN,  
USA

## Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
