## Deep Processing and Comprehensive Utilization of Agricultural Products

Guest Editors:

**Dr. Juan Wang**

School of Food Science and Engineering, South China University of Technology, Guangzhou, China

**Prof. Dr. Jihong Huang**

College of Agriculture, Henan University, Zhengzhou, China

Deadline for manuscript submissions:

**16 March 2025**

### Message from the Guest Editors

There are many types of agricultural resources all over the world, including grain and oil, fruits and vegetables, livestock and poultry, aquatic products, plants with some functional ingredients, edible fungi, and so on. They are the main raw materials of the food industry. With the progress of science and technology, deep processing technology, equipment, and other aspects of agricultural products have also seen great development. In addition, the comprehensive utilization of by-products in the processing of agricultural products is also a field that the food industry needs to focus on, such as the extraction of polysaccharides /polyphenols /dietary fibers from fruit peels, using wheat bran in some bakery products, using the shells of shrimp and crab for animal feed, and so on. Through deep processing, by-product wastes can be turned into treasures. Therefore, this Special Issue aims to collect basic research and applied research related to technology, processing, equipment, product development, and high-value utilization of by-products in the field of agricultural product processing.

## Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
