Message from the Guest Editors

The improvement of the quality of breast milk could be achieved after correction of the maternal diet or by supplementation, a practice that will benefit both maternal and infant health. However, on many occasions, breastfeeding is not possible, or is not desired. In this context, infant formula is used as a substitute for breast milk. Bringing infant formulas closer to the composition of human milk is the basis of their formulation. The ability to detect and identify the set of components that exist in breast milk has improved with the advent of omics technologies. These are components with properties that promote the maturation and development of the infant, and are anti-infective, prebiotic, probiotic and modulators of immune development. In this Special Issue, we want to include papers related to the advances and challenges in breastfeeding and infant formulas, with a focus on improving their functionality and adequacy to meet the baby's needs. The same interest applies to other baby foods. We also invite papers in relation to supplementation in pregnancy and lactation. Novel aspects of complementary feeding will also be considered.

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
