Food Risk Assessment and Control of Food Hazards

Guest Editors:

Prof. Dr. Ljilja Torović

1. Department of Pharmacy, Faculty of Medicine, University of Novi Sad, Novi Sad, Serbia
2. Center for Medical and Pharmaceutical Investigations and Quality Control, Faculty of Medicine, University of Novi Sad, Novi Sad, Serbia

Dr. Paula Cristina Alvim

1. Food and Nutrition Department, National Institute of Health Dr. Ricardo Jorge, Lisbon, Portugal
2. Centre for Environmental and Marine Studies (CESAM), University of Aveiro, Aveiro, Portugal

Deadline for manuscript submissions:
closed (31 January 2024)

Message from the Guest Editors

Dear Colleagues,

The principal objective in the risk assessment of food is the protection of public health via the identification of potential food hazards, the assessment of population exposure, based on either human biomonitoring or food (contaminants) analysis, and the evaluation of the obtained data with regard to the toxicological profile of the hazard and susceptibility of the exposed population. A tremendous number of potential hazards and their combined occurrence—changing consumer preferences and food consumption patterns, new food sources and food production systems, circular economy, climate change, among others—could affect food safety and determine food health impact. The endeavor to assure food safety and reduce the risk of foodborne diseases throws up a variety of challenges, and calls for action from food scientists, producers, risk assessors and managers.

The Special Issue on “Food Risk Assessment and Control of the Food Hazards” invites recent research and review articles which introduce the topic at hand and provide an overview of its current status and future perspectives.

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
