## Impact of Pretreatment on Physicochemical and Nutritional Properties of Milk Protein

Guest Editors:

**Dr. Meram Chalamaiah**

Department of Agricultural, Food, and Nutritional Science, University of Alberta, Edmonton, AB, Canada

**Dr. Xiaofeng Ren**

Institute of Food Physical Processing, Jiangsu University, No. 301, Xuefu Road, Zhenjiang 212013, China

Deadline for manuscript submissions:

**closed (25 October 2022)**

### Message from the Guest Editors

Milk protein is an important component for preparation of many high-protein foods due to its excellent nutritional and physicochemical properties. Several methods such as chemical alterations, enzymatic hydrolysis, heat treatment, ultrasound, high pressure, pulsed electric field, and gamma irradiation technologies have been used for the pretreatment of milk in order to enhance the functionalities, nutritional value and bioactive properties. The nutritional value and functional performance of milk proteins are significantly affected by the choice of pretreatment method. Solubility, foaming, emulsification, and gelation are important physicochemical properties of milk proteins that are altered considerably by pretreatment methods. Modification of milk proteins by using various pretreatment methods would open up new avenues for better utilization of milk proteins in food and non-food industries.

## Editor-in-Chief

### Prof. Dr. Arun K. Bhunia

1. Department of Food Science,  
Purdue University, West  
Lafayette, IN, USA

2. Department of Comparative  
Pathobiology (Courtesy), Purdue  
University, West Lafayette, IN,  
USA

## Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
