Message from the Guest Editors

Dear Colleagues,

The study of microbiomes and their ecology is unravelling new information regarding the biodiversity related to a particular niche (agro-food and/or human-related) and provides new data on the players that can be exploited to develop new products and/or improve their quality. Thus, food systems have much to gain from microbiome studies, transforming potential bioresources in new and/or improved starter/adjunct cultures and probiotics.

This special issue aims at collecting contributions in the different depicted areas: experimental researches as well as reviews and opinion papers are welcome dealing with basic and applied research on (i) microbial biodiversity discovery and (ii) application for safer, tastier and more nutritious food, feed and supplement formulations, (iii) technology transfer, (iv) regulatory issues and (v) consumers' science to contribute to the definition of a systemic view on microbial bioresources as starter cultures and health-related applications in the one health perspective.

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
