Avellino, Italy

Deadline for manuscript
submissions:

31 December 2024

Message from the Guest Editors

In recent years, natural compounds derived from plant-based matrixes have become increasingly important for their potential applications in the field of health. However, their use has opened up new challenges in i) obtaining extracts with a high qualitative value via standardizing extraction and purification processes; ii) identifying the components of extracts through chemical characterization; and iii) delivery techniques that enable components to be stabilized over time through the use of procedures. Despite these challenges, which are under study, such extracts have a number of broad health benefits due to their additive or synergistic effects as well as multiple applications for human health.

For this Special Issue, we aim to collect scientific papers on in vitro, in vivo, and ex vivo studies of natural plant extracts and their applications for human health. Biological and nutritional mechanisms, as well as the potential of using bioactive extracts in the prevention of diseases, will all be discussed.

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
