### Message from the Guest Editors

Active packaging is an excellent concept with the perspective of increasing food shelf-life and allowing to reduce food losses. This food packaging concept is also valorizing environmental health; therefore, there is an increasing development of active systems that use bio-based polymers. In order to protect foods from oxidation reactions, the food industry employs antioxidants, which are generally synthetic and directly added to foodstuffs. However, they can also be incorporated in the packaging with the aim of being controlled release and to exhibit their action in the surface of foods. This Special Issue encourages the submission of high-quality original research and review articles, covering recent advancements on antioxidant active food packaging.

## Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
