## Chemometric Analysis of Food: Spectroscopic Techniques, Authenticity Identification and Food Applications

Guest Editors:

### **Dr. Geraldine Dowling**

1. Department of Life Science,  
School of Science, Atlantic  
Technological University, Ash  
Lane, Ballinode, F91 YW50 Sligo,  
Ireland

2. Cameron Forensic Medical  
Sciences, Centre for Clinical  
Pharmacology, William Harvey  
Research Institute, Barts and The  
London School of Medicine and  
Dentistry, Queen Mary University  
of London, Charterhouse Square,  
London EC1M 6BQ, UK

### **Prof. Dr. Emilio Alvarez-Parrilla**

Chemical-Biological Sciences  
Department, Autonomous  
University of Ciudad Juarez,  
Ciudad Juarez, Mexico

Deadline for manuscript  
submissions:

**closed (15 June 2024)**

### **Message from the Guest Editors**

There is a need for innovative analytical approaches in the food safety field to authenticate the food quality of products for consumers. The evaluation of spectroscopy tools is rapidly gaining ground at all levels in food authenticity analyses. Chemometrics can be deemed an essential approach for the differentiation of similar samples that require authentication by authorities. For instance, recent advances through the dissemination of 'fingerprinting strategies' have enabled the study of many factors that influence food identity. It is worth noting that in authenticity studies, there are a wide range of areas to consider, such as chemical constituents, freshness, toxic substances, microorganisms and adulteration monitoring. In addition, providing evidence of the traceability of food variety and origin is critical.

This Special Issue invites authors to submit articles that focus on spectroscopy and chemometrics in an area of food authenticity that may focus on the topics below.

- Identification of products in accordance with the associated species
- Farming system approaches
- Geographical origin
- Production methods
- Processing techniques

## Editor-in-Chief

### Prof. Dr. Arun K. Bhunia

1. Department of Food Science,  
Purdue University, West  
Lafayette, IN, USA

2. Department of Comparative  
Pathobiology (Courtesy), Purdue  
University, West Lafayette, IN,  
USA

## Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
