Message from the Guest Editor

The world today confronts troubling trends that impact food security. The first trend is an increase in the world's population and the rising number of countries that are food importers. The second trend is that the world's food supply will be pressured by the twin effects of environment degradation and climate change. The third trend is a rise in populism and nationalism which has increased trade protectionism. The fourth trend is an increase in the number of weak and at-risk states which are poorly equipped to address their food insecurity and therefore face political instability.

The purpose of this Special Issue of *Foods* is to examine global food security challenges. Individual papers will identify and analyze the primary food security challenge or challenges for a given country, cohort or group, strategies for mitigation of food insecurity, sources of resilience, and prospects for success. It would be useful to analyze food security/insecurity within the context of one or more of the following: food trade, climate change, environmental degradation, supply and/or distribution, and governance and food policies.

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
