Structural Characterization of Food Proteins and Peptides

Guest Editors:

Prof. Dr. Vincenzo Cunsolo

Department of Chemical Sciences, Laboratory of Organic Mass Spectrometry (LOMS), University of Catania, 95126 Catania, Italy

Dr. Vera Muccilli

Department of Chemical Sciences, University of Catania, Viale A. Doria 6, 95125 Catania, Italy

Prof. Dr. Rosaria Saletti

Department of Chemical Sciences, Laboratory of Organic Mass Spectrometry (LOMS), University of Catania, Catania, Italy

Deadline for manuscript submissions:

30 November 2024

Message from the Guest Editors

In recent decades, the agrifood sector, due to the globalization and the development of new technologies, is undergoing important changes that require a deeper characterization of the food chain, starting from raw materials up to the final products. There is no doubt that proteins represent the key factor in the human diet, primarily sourced from animals and plants such as dairy, cereals, fish, and meat. Characterization of the protein fraction in foodstuffs may help us to understand the relationship between the protein content and the nutritional and technological properties of foods, for designing new strategies for food traceability, quality, and safety, and also for identifying genetically modified products and microbial contaminants. Moreover, considering the widespread presence of allergenic proteins in some of the most extensively eaten food (i.e., milk, eggs, cereals, etc.), it is clear how the detection of allergenic proteins represents a powerful tool for food control, providing the basis for the production of hypo-allergenic or nutraceutical foods (Pharma-Foods).

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
