Processing and Nutritional Evaluation of Animal Products

Guest Editors:

Dr. Guofeng Jin

School of Food and Health,
Beijing Technology and Business
University, Beijing 102401, China

Dr. Yuanyuan Liu

School of Liquor and Food
Engineering, Guizhou University,
Guiyang 550025, China

Dr. Xiaoyan Tang

Institute of Quality Standard and
Testing Technology for Agro-
Products of Chinese Academy of
Agricultural Sciences, Beijing,
China

Deadline for manuscript
submissions:

20 October 2024

Message from the Guest Editors

Animal products play an increasingly important role in our modern diet and ensuring food security. Processing is an indispensable part of food manufacturing to convert raw material into desirable and digestible forms. The processing of animal products includes both physical, chemical, and biological technologies. There has been increased interest recently in the functional development and utilization of animal by-products. These processing technologies are applied to fulfil some critical requirements of the food industry and consumers. They also allow the production of designer products that fulfil special requirements such as reduced sodium, high fiber content, and improved product stability against oxidative processes. Recently, there has been increasing market demand for products with increased functional and nutraceutical value. Nutritional value is an important characteristic for animal products. Nutritional evaluation plays a very important role in guiding the processing of animal products, especially for some functional foods. Meanwhile, scientific nutritional evaluation can also help consumers gain a more accurate understanding of animal products.

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
