Dear Colleagues,

In the 21st century, the food industry is facing various environmental changes. In particular, during and after the COVID-19 era, the food industry continues to be threatened by various pathogenic bacteria, viruses, and unidentified microorganisms. In addition, the types of new foods available are becoming more diverse. Accordingly, in the food industry, there is a demand for the development of new technologies to effectively control various microorganisms while minimizing the impact on food quality. This Special Issue will cover diverse innovative technologies, including physical and biological treatments to enhance food safety as well as food quality.
