Microalgae-Based Ingredients and Food Products: Biotechnological Production and Application

Guest Editors:

Dr. Mariany Costa Deprá

Food Science and Technology
Department, Federal University of
Santa Maria, Santa Maria, RS,
Brazil

Prof. Dr. Eduardo Jacob-Lopes

Food Science and Technology
Department, Federal University of
Santa Maria, Santa Maria, RS,
Brazil

Dr. Leila Queiroz Zepka

Food Science and Technology
Department, Federal University of
Santa Maria, Santa Maria, RS,
Brazil

Deadline for manuscript
submissions:

15 January 2025

Message from the Guest Editors

Food is one of the basic needs of life. Spiral problems associated with food demand and climate change have triggered a dilemma between food and sustainability, requiring crucial advances and innovative skills for the development of next-generation food ingredients. Thus, microalgal biomass—a proposed gold mine—has opened a new door for the sustainable food industry. Their cells, powered by photosynthesis, are sustainable expression chassis for multiple metabolites of nutritional interest. However, for microalgae-based ingredients to move from a *flash-in-the-pan* innovation to an industrial consolidation, science, engineering, and technology should build robust bridges over the old chasms that compose the death valley of microalgal biotechnology.

This Special Issue welcomes original research articles, reviews, short communications, and opinions about microalgae-based ingredient applications in the food industry, including (i) microalgae strains; (ii) the bioavailability and bioaccessibility of microalgae compounds; (iii) bioprocesses and bioengineering; (iv) sustainability metrics and indicators; and (v) policy interventions and regulatory issues.

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
