Message from the Guest Editors

Aquatic products are a major food source for humans. In addition to major aquatic products such as fish, shellfish, crustaceans, and algae, a large number of nutritious compounds, including proteins, polysaccharides, and lipids, have been identified and isolated from these major aquatic products. Recently, there has been increasing demand for these nutritious compounds for their health benefits. Isolation and processing of these valuable aquatic compounds is complicated. Biotechnology provides powerful tools to process the aquatic products for the compounds, and increased demand for these aquatic nutritious compounds encourages scientists to study the biotechnology for aquatic products processing. This Special Issue aims to collect the most recent advances in the biotechnology in aquatic products processing and provide platform for related articles.

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
