Last Trends in Food Contact Materials Safety Evaluation: New Advances in Chemical Food Analysis

Guest Editors:

Prof. Dr. Ana Rodríguez Bernaldo de Quirós

Analytical Chemistry, Nutrition and Bromatology Department, Pharmacy Faculty, Campus Vida s/n, University of Santiago de Compostela, 15782 Santiago de Compostela, La Coruña, Spain

Dr. Raquel Sendón

Department of Analytical Chemistry, Nutrition and Food Science, Faculty of Pharmacy, University of Santiago de Compostela, 15782-Santiago de Compostela, Spain

Deadline for manuscript submissions:

closed (10 July 2021)

Message from the Guest Editors

One of the major concerns associated with the safety of food contact materials is the migration of harmful substances to the food, since they can cause adverse effects on the consumers' health through dietary exposure. The potential migrants can be well-defined and known substances, but also complex mixtures or even unknown substances. Moreover, some of them can be non-intentionally added substances (NIAS) that comprise substances that have not been added for a technical reason during the manufacture of the material and include impurities, degradation products, reaction products, etc. Recently, the identification of NIAS has attracted the interest of scientists, and new analytical strategies that involve the use of advanced techniques are being applied to address this issue.

On the other hand, in past years, the development of novel materials including nanomaterials for food contact has grown for many applications, while guaranteeing the safety of these new systems introduces new challenges.

The objective of this Special Issue is to compile the latest research on the safety evaluation of food contact materials; original contributions and review articles are welcome.

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
