Food Origin Analysis with Isotope Fingerprints

Guest Editors:

Dr. Micha Horacek

HBLFA Francisco-Josephinum BLT Wieselburg, Wieselburg, Austria

Prof. Dr. Andrew Cannavan

Head of Food and Environmental Protection Laboratory, Department of Nuclear Sciences and Applications, IAEA (International Atomic Energy Agency), Vienna, Austria

Prof. Dr. Nives Ogrinc

Jožef Stefan Institute, Department of Environmental Sciences, Jamova 39 1000, Ljubljana

Deadline for manuscript submissions: closed (31 December 2022)

Message from the Guest Editors

The control of the geographic origin of food has become of increasing importance, as consumers prefer regionality, high quality, sustainability, a small(er) carbon footprint, short distances, animal welfare, support of local farmers and national/regional economy, and many more claims connected to food of regional production. In many countries, food of national and regional production is preferred to food coming from abroad, albeit with some exceptions. Also, countries aim to increase consumer awareness with respect to regional production, as this strengthens regional economy and agriculture, and an increase in demand usually leads to a higher price that the consumer is willing to pay with respect to competing products from abroad.

In the proposed Special Issue, contributions on state-ofthe-art methodology and new research on stable isotope analysis and additional techniques for the control and determination of geographic origin are welcome. Research articles and review articles as well as short communications are invited.

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, Foods has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
