## Food By-Products as a Source of Proteins and Peptides

Guest Editor:

**Dr. Maria Hayes**

The Food BioSciences  
Department, Teagasc Food  
Research Centre, Ashtown,  
Dublin 15, Ireland

Deadline for manuscript  
submissions:

**closed (15 February 2022)**

### Message from the Guest Editor

Processing foods generates co-products and by-products that can be rich in proteins and peptides that are largely not utilised at present. To make food processing more economically and environmentally sustainable, procedures can be implemented that target total use of the biomass and go towards generating new markets and products. These products often consist of protein and peptides that have several potential techno-functional and bioactive health benefits. Nutritional benefits and methods to measure the same will be collated. This Special Issue will look at the generation of proteins and peptides from several food sources including traditional sources such as meat, dairy and fish but also their co-products. In addition, extraction and characterisation of proteins and peptides from alternative protein sources including cereals, microalgae, seaweeds and their by-products of extraction will also be examined. Techno-functional characterisation and life cycle analysis will be discussed along with current and potential applications of products developed from food processing by-products.

Pathobiology (Courtesy), Purdue  
University, West Lafayette, IN,  
USA

## Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
