Microbiological Safety and Quality of Fermented Products

Guest Editors:

Prof. Dr. Xuewu Guo

College of Biotechnology, Tianjin University of Science and Technology, Tianjin 300457, China

Dr. Hai Du

School of Biotechnology, Jiangnan University, Wuxi 214122, China

Dr. Guangsen Fan

School of Food and Health, Beijing Technology and Business University, Beijing 100048, China

Deadline for manuscript submissions:
closed (20 January 2023)

Message from the Guest Editors

Fermented foods are foods that have appeared by chance and are inevitable in the long history of human development. There are rich and diverse fermented foods all over the world, which not only have unique flavors and qualities but also carry the local culture and play an important role in human life. With the deepening of people's understanding of fermented foods, people clearly realize that fermented foods cannot be separated from microorganisms (enzymes), and the types of microorganisms (enzymes) and their regular alternation make the different characteristics of fermented food. At present, many traditional fermented foods are still produced in the open fermentation mode, leading to difficulties in knowing the safety and function of microorganisms. For this reason, it is necessary to communicate widely about the functional properties of microorganisms in fermented foods around the world and the impact of these microorganisms on the safety and quality of fermented foods, thus contributing to the promotion of safety and high quality of fermented foods.

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
