## Nuclear Magnetic Resonance in Food Analysis

Guest Editors:

**Prof. Dr. Emmanuel Hatzakis**

Department of Food Science and Technology, The Ohio State University, Columbus, USA

**Prof. Dr. Prokopios Magiatis**

Department of Pharmacognosy and Chemistry of Natural Products, National and Kapodistrian University of Athens, Greece

Deadline for manuscript submissions:

**closed (28 February 2021)**

### Message from the Guest Editors

Dear Colleagues,

Foods are complex systems and their rapid and reliable analysis has a tremendous economic, societal and health impact. As a result, much effort has been expended in developing powerful analytical methods for the analysis and evaluation of food products. Nuclear Magnetic Resonance (NMR) is an emerging tool to analyse foods for their composition and physicochemical properties in a rapid and reliable manner. NMR is quantitative, highly reproducible and provides invaluable information for structural elucidation. Although high-field NMR instrumentation is generally expensive, it becomes cost-effective in the long term, while low-field NMR applications become more popular due to the lower economic cost and the user-friendly environment. This Special Issue welcomes original papers and review articles on the application of NMR in food analysis.

## Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
