## Frontier Research and Applications of Biodegradable Packaging Systems from Agroindustrial Residues

Guest Editors:

**Prof. Dr. Suzana Mali**

Department of Biochemistry and Biotechnology, State University of Londrina, Mailbox 10.011, 86057-970 Londrina-PR, Brazil

**Prof. Dr. Fábio Yamashita**

Department of Food Science and Technology, State University of Londrina, Mailbox 10.011, 86057-970 Londrina-PR, Brazil

**Prof. Dr. Andre Luiz Martinez de Oliveira**

Department of Biochemistry and Biotechnology, State University of Londrina, Mailbox 10.011, 86057-970 Londrina-PR, Brazil

Deadline for manuscript submissions:

**closed (30 August 2022)**

### Message from the Guest Editors

The use of environmentally friendly raw materials to obtain new packaging systems is an issue that has attracted the increased attention of researchers worldwide over the last two decades. The development of biodegradable packaging originating from renewable sources is an important and challenging area of research, and these materials can be used for several applications, including in the food, agriculture and pharmaceutical sectors. The high production rate associated with the low feedstock cost of lignocellulosic agroindustrial residues makes them promising raw materials for value-added product development. The valorization of these residues is within the scope of biorefinery and bioeconomy, with the aim of developing a sustainable economy using renewable resources to obtain biobased products.

In this Special Issue, we are encouraging manuscripts related to the development of biodegradable packaging systems from agroindustrial residues, including the pretreatment of the residues, processing technologies, and the characterization and application of these new packaging systems.

## Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

## Author Benefits

**Open Access:** free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

**High Visibility:** indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

**Journal Rank:** JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
