Deadline for manuscript
submissions:

closed (31 October 2022)

Message from the Guest Editor

Ultra-high-pressure technology is a non-thermal processing technology with the most industrialized application potential. Its principle is to create an ultra-high-pressure environment for processing objects different from the atmospheric environment, promote reversible or irreversible physical or chemical reaction aiming at volume reduction, and then achieve a series of processing purposes. In recent years, the application of ultra-high-pressure technology in fruit and vegetable agricultural products has become a hotspot of relevant research. Ultra-high-pressure technology is more and more used in fruit and vegetable sterilization, preservation, and quality improvement.

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Author Benefits

Open Access: free for readers, with [article processing charges \(APC\)](#) paid by authors or their institutions.

High Visibility: indexed within [Scopus](#), [SCIE \(Web of Science\)](#), [PubMed](#), [PMC](#), [FSTA](#), [AGRIS](#), [PubAg](#), and [other databases](#).

Journal Rank: JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))
