

## Special Issue

# Bioactivity of Protein Hydrolysates Extracted from Foods

### Message from the Guest Editor

Protein and bioactive peptides, especially those derived from food, play important roles in the metabolic functions of living organisms and, consequently, in human health. Proteins from plant and animal origins are potential sources of a wide range of BPs encrypted in their structure. They can be classified based on their mode of action as antimicrobial, anti-thrombotic, antihypertensive, opioid, immunomodulatory, mineral binding, and antioxidative. Enzymatic hydrolysis is the most effective method of producing functional hydrolysates or bioactive peptides. Moreover, the correlation between structure and functional properties is still not well understood; therefore, crude extracts, known as hydrolysates, are often acceptable and used widely in practice. Although there have been many results and findings in the functionalities of bioactive hydrolysates or peptides originated from food proteins, there is still a hole between basic knowledge and practice. The objective of this Special Issue is therefore to highlight the existing knowledge of the various potential benefits of the bioactivity of protein hydrolysates in improving the nutritional and health-related properties of foods.

### Guest Editor

Prof. Dr. Adam Wasko

Department of Biotechnology, Microbiology and Human Nutrition,  
Faculty of Food Science and Biotechnology, University of Life Sciences  
in Lublin, Lublin, Poland

### Deadline for manuscript submissions

closed (1 August 2023)

## About the Journal

### Message from the Editor-in-Chief

*Foods* (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

#### Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
