

Special Issue

Food Packaging: Biodegradable, Active and Intelligent

Message from the Guest Editors

Packaging is of fundamental importance in maintaining the quality of food and other products. Synthetic polymers are widely used; however, the environmental problems caused and, in some cases, the difficulties in recycling caused by the large-scale use of these materials have necessitated alternatives. The development of packaging based on natural polymers, obtained from renewable sources, is being explored and has potential for replacing, even if partially, synthetic polymers. This Special Issue, "Food Packaging: Biodegradable, Active and Intelligent", will bring together relevant works that demonstrate advances in the production and characterization of packaging based on natural polymers with different functions. Among the functionalities of these types of packaging, the antioxidant activity and incorporation of intelligent systems that inform the consumer about specific food characteristics has aroused interest in different possible applications. Thus, we invite you to submit research articles on the latest work in this area, which highlights applications in the food packaging industry.

About the Journal

Message from the Editor-in-Chief

Foods (ISSN 2304-8158) is an open access and peer reviewed scientific journal that publishes original articles, critical reviews, case reports, and short communications on food science. Articles are released monthly online, with unlimited free access. Currently, *Foods* has been indexed by the Science Citation Index Expanded (SCIE - Web of Science), PubMed, and Scopus. Our aim is to encourage scientists, researchers, and other food professionals to publish their experimental and theoretical results as much detail as possible. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global food science community.

Editor-in-Chief

Prof. Dr. Arun K. Bhunia

1. Department of Food Science, Purdue University, West Lafayette, IN 47907, USA
2. Department of Comparative Pathobiology, Purdue University, West Lafayette, IN 47907, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, FSTA, AGRIS, PubAg, and other databases.

Journal Rank:

JCR - Q1 (Food Science and Technology) / CiteScore - Q1 (Health Professions (miscellaneous))

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15 days after submission; acceptance to publication is undertaken in 2.6 days (median values for papers published in this journal in the second half of 2025).
