Message from the Guest Editors

Dear Colleagues,

Ecosystem degradation is a major challenge for sustainable development. Ecosystem degradation assessment and restoration are increasingly carried out at different scales and on different aspects. Therefore, this Special Issue aims to explore the integration of methods and results from multi-scale ecosystem degradation assessment and the coordination of multi-dimensional restoration strategies concerning both nature and humans.

Papers addressing the following topics are welcome:

1) papers assessing ecosystem degradation and resilience potential through multisource data at multiple scales; 2) papers assisting decision-making by simultaneously considering regional ecological restoration planning, local ecological restoration technology, and regional sustainable development goals; 3) papers addressing the ecological degradation and restoration of human-dominated ecosystems, previously less-concerned taxonomic groups, and newly emerged ecological networks. Both theoretical and case studies will be published, emphasizing forest and grassland ecosystems.

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)
