Deadline for manuscript submissions:

**closed (10 January 2024)**

### Message from the Guest Editors

Dear Colleagues,

Forests are essential components of green infrastructure. Their health affects environmental quality in many ways, and the opposite is also true. The services they provide are recognized as key in tackling climate change effects at local and global scales. Remote sensing/Earth observation (RS/EO) technologies provide a whole series of information that gives access to the mapping and multi-temporal analysis of the spectral behavior of tree species. Specific vegetation indexes can give insights into forest health status and complement future scenario elaborations. On the other hand, GIS-based technologies can add and implement the current knowledge with either spatial or multi-criteria analysis of the many variables influencing tree communities. Eventually, improvements in statistical correlations between remotely sensed and ground data have the potential to improve the quality and reliability of available information.

This Special Issue aims to garner state-of-the-art RS/EO-based and GIS-based knowledge, artificial intelligence and machine learning applications concerning forests' and urban forests' monitoring and management.

## Message from the Editorial Board

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

**Journal Rank:** JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
