Deadline for manuscript  
submissions:

**30 November 2025**

### Message from the Guest Editors

In the context of accelerating climate change and intensifying land use pressures, understanding forest dynamics has never been more critical. The interactions between climate change and land use change create complex feedback loops, complicating forest management and conservation strategies. Adaptive management approaches that incorporate predictive modeling and real-time monitoring are essential for mitigating these adverse effects and enhancing the resilience of forest ecosystems. Hence, there is a need for integrated policies that address both climate and land use impacts to sustain and restore forest ecosystems in the face of environmental change.

Potential topics include, but are not limited to:

The impacts of climate and land use change on forest functioning;

The responses of vegetation, soil, and epigeal fauna;

The resistance and resilience of forest ecosystems to global changes;

The modeling of future scenarios of forest changes under different climate and land use transformations;

The restoration of forest ecosystems.

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

## Message from the Editor-in-Chief

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

**Journal Rank:** JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)
