Deadline for manuscript submissions:

closed (10 July 2023)

Message from the Guest Editor

Phyllophagous insects, such as beetles, aphids, butterflies, bugs, etc., play an important role in forest ecosystems all over the world. Many of them are forest pests. However, there are serious gaps in our current knowledge of their ecology and biodiversity. Interactions between phyllophagous insects and their host plants are particularly poorly studied.

We invite colleagues to share new data on the geographical distribution, diet, feeding behavior, life cycle, and other aspects of insects feeding on shrubs, grasses, and the leaves of forest trees.

Recent data indicate that invasions of phyllophagous insects have become much more frequent in the last three decades. Therefore, articles on invasive species are particularly encouraged. Both original research papers and reviews are welcome

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
