Message from the Guest Editors

The monitoring, management, and conservation of forest biodiversity are essential to ensuring the health of forests, their ability to provide vital ecosystem services, and their value as a refuge for wildlife and a source of human wellbeing. The purpose of this Special Issue is to analyze the challenges and solutions in the implementation of management strategies for forest conservation. Researchers from various disciplines, such as theoretical ecology, landscape management, policy, and sociology, are invited to contribute papers that address the topics raised in this Special Issue.
