Machine Learning and Big Data Analytics in Forestry

Guest Editors:

Prof. Dr. Stelian Alexandru Borz

Department of Forest Engineering, Forest Management Planning and Terrestrial Measurements, Faculty of Silviculture and Forest Engineering, Transilvania University of Brasov, Șirul Beethoven 1, 500123 Brasov, Romania

Dr. Nopparat Kaakkurivaara

Department of Forest Engineering, Faculty of Forestry, Kasetsart University, 50 Ngamwongwan Rd., Ladyao, Chatuchak, Bangkok 10900, Thailand

Message from the Guest Editors

The availability of conventional and new modalities to collect data has brought many opportunities to better document, model and understand forest ecosystems and their management in all the aspects and components of forestry and forest management. Handling big datasets, however, requires advanced tools and methods able to discover and explain complex patterns and inter-relations, while providing gold-standard accurate or improved representations of the underlying behaviors and processes. This Special Issue is focused on collecting high-quality contributions which harness the availability of big data in forestry through the use of conventional and advanced machine learning algorithms and protocols to extract and model useful information with the purpose of better documenting and explaining patterns and relations which are important for the scaled practice and science supporting forestry and forest management.

Deadline for manuscript submissions:
closed (31 March 2024)

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
