Message from the Guest Editor

In response to unprecedented need, practitioners, NGOs, and policymakers are seeking ways to scale up restoration over vast areas. Forest and Landscape Restoration (FLR) is an approach that provides benefits to both people and nature with multiple restoration options. Most effective restoration projects provide tangible benefits and actively engage local communities in planning and carrying out restoration. However, the field still grapples with how to engage communities, implement restoration, and manage projects autonomously in the long term. Community forestry has been tackling how to devolve resource control to local people to achieve economic and ecological benefits.

The goal of this Special Issue is to explore the potential of community forestry in FLR. This SI seeks papers that address these topics through case examples from around the world. We invite papers from a range of fields and disciplines; with a focus on ecological, social, and/or economic factors, but should attempt to explore all three to some degree (especially case studies). Empirical work or reviews are welcome. Additional guidance will be provided for case study write-ups.

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
