Department of Environmental, Biological and Pharmaceutical Sciences and Technologies, University of Campania “Luigi Vanvitelli”, Caserta, Italy

**Dr. Francesco Niccoli**

Department of Environmental, Biological and Pharmaceutical Sciences and Technologies, Università degli Studi della Campania Luigi Vanvitelli, Caserta, Italy

Deadline for manuscript submissions:

**31 July 2024**

### Message from the Guest Editors

Forests play an essential role in mitigating climate change thanks to their ability to regulate terrestrial water and carbon cycles. Changes in temperature and precipitation increased the frequency and intensity of extreme meteorological events (droughts, heatwaves, and floods) impacting forest eco-physiology.

Trees react plastically to extreme climate events through changes in water-use efficiency, stomatal/photosynthetic behavior, and through adjustments in functional and hydraulic traits. There is a risk that forests may exceed their tolerance thresholds in the future, resulting in increasing tree mortality.

This Special Issue welcomes original research, including multidisciplinary approaches (such as eco-physiology, dendro-ecology, stable isotopes, remote sensing, etc.) performed at individual or population scale. Potential topics include:

- Detection of drivers and mechanisms behind forest water-use responses to climate change
- Identification of tree survival strategies for extreme climate
- Understanding of the eco-physiological processes responsible for tree mortality and decreases in tree growth in drought conditions
- Effects of forest management on tree water-use dynamics

an Open Access Journal by MDPI

## Editors-in-Chief

### Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

### Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

## Message from the Editorial Board

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

**Journal Rank:** JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
