Message from the Guest Editors

While climate change is the seminal issue of our time, the particular importance of forests cannot be overstated. Trees sequester carbon from the atmosphere when planted and release carbon upon harvest. However, wood products maintain a part of that carbon when the wood is harvested for biomass used in raw materials. As such, the timber market is particularly vulnerable to the impacts of climate change.

This Special Issue will provide insights into how the timber market reacts to climate change and relevant policies on the national, regional and global levels. These insights will assist readers in understanding what to expect from and how to forecast the timber and wood product market under the influence of climate change, as well as provide selected contributions to the long-term balance of carbon management within forestry.

Potential topics include, but are not limited to:

- Climate change and timber market;
- Carbon neutrality and Wood market;
- Prices of wood products to climate change;
- Supply and demand of timber in the future;
- Trade of wood products under Paris climate agreement.

Special Issue

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
