Message from the Guest Editor

In this Special Issue of *Forests*, we propose to aggregate innovative new research on the characterization of C and N functioning in temperate, boreal, and tropical forest ecosystems. It will notably concern research on C and N cycling in forests, trees, and all the plant and soil processes involved in these cycles: internal C and N allocation, assimilation, storage, fruiting, interaction between tree and soil, tree–soil C and N transfer, forest soil organic matter dynamics, and more globally, forest ecosystems fluxes.

Keywords

C and N cycles
tree–soil system
forest ecosystem
allocation
organic matter
climate
forest management pests

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
