Flagstaff, AZ 86011, USA

Deadline for manuscript  
submissions:

**closed (31 March 2020)**

### Message from the Guest Editor

This Special Issue will illustrate and exchange ideas about how forest management tools and practices that are commonly used in today's forest operations can effectively accomplish a wide range of forest restoration objectives. We would welcome any topics and examples of original research articles showcasing the use of forest operations as a means to accomplish forest restoration objectives, such as (but not limited to):

- forest ecosystem restoration treatments
- controlling the spread of insects and pests
- enhancement of wildlife/fish habitats and biodiversity
- increased watery yield and supply,
- removal and utilization of non-native species
- fire hazard reduction,
- utilization of woody materials resulting from forest restoration treatments, and
- other innovative forest operations that contribute to the success of forest restoration.

## Message from the Editorial Board

*Forests* (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

**Journal Rank:** JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
