closed (30 November 2024)

Message from the Guest Editors

Economic and policy analysis is vital in forest management, harmonizing economic growth, environmental protection, and social welfare. This Special Issue welcomes research papers that shed light on the intricate interplay between economics and policy in sustainable forest management. This involves a range of research areas, including analyzing the cost and benefits of various forest applications, evaluating the efficiency of policies, examining the influence of international or national agreements on forests, and utilizing green technologies that support sustainable forest management or decision making. Furthermore, the Special Issue aims to explore the incorporation of indigenous and local knowledge into forest management practices, with the goal of fostering positive outcomes for environmental preservation, socio-economic considerations, and the enduring sustainability and productivity of the forest sector.

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
