Message from the Guest Editors

With the consumption of high-quality tea, tea producers are facing enormous problems, such as climate change, lack of labor and the high cost of agricultural inputs, tea cultivation and management needs to address these challenges. In this research topic, we are focusing on the latest research in the cultivation and management of tea trees. We particularly welcome contributions that include, but not are limited to, the following topics:

- Tea plant physiology and biochemistry;
- Tea plant nutrition and fertilization;
- Soil physics, chemistry and biochemistry;
- Pests, diseases, weeds and their management;
- Climate change and its mitigation and adaption;
- Inter planting and other micro-climate management;
- Interaction of tea plant with the environment;
- Organic and low carbon tea production;
- Other field operations and management for tea cultivation.

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
