Message from the Guest Editor

Dear Colleagues,

Human activities are affecting practically all ecosystems around the globe. In some cases, the changes have been drastic, and in the human time horizon, permanent. In some cases, the changes are less extreme, but definitely do have biodiversity impacts. Increasing population and, at the same time, an increasing demand for replacing the use of non-renewable natural resources with renewable ones, is expected to increase the need for the active management of forests.

Forest scientists and ecologists have developed models for making scenarios of the development of forests under different management practices and other disturbances. To better understand the trade-offs between different ecosystem services, especially biodiversity and timber/bioeconomy production, we invite research articles on scenario analyses done at the regional or national levels. Research questions may include: Future development of forest biodiversity under different forest use scenarios, mitigating the impacts of forest management on biodiversity, comparison of alternative cutting regimes, cost-effective management of forest biodiversity.

forests

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
