submissions:

closed (30 November 2021)

Message from the Guest Editors

This Special Issue of *Forests* deals with the mapping and assessment of woodland and forest ecosystems and their services, highlighting their important role in modern spatial planning schemes and conservation strategies, and aims to: (a) promote best practices from the local to the international level, (b) provide guidance on ecosystem services indicators development to inform decision making, (c) present mapping and remote sensing techniques for ecosystem condition and ecosystem services assessments, (d) integrate ecosystem services into natural capital accounting, (e) identify spatial and temporal knowledge gaps, (f) identify and interpret the role of stakeholders in the decision-making process, and (e) provide policy implications and governance practices. Finally, manuscripts that deal with landscape restoration, the interplay among forests and other ecosystems and land uses, as well as with cultural landscapes delineation, assessment and management, are also welcome.

Special Issue

an Open Access Journal by MDPI

Editors-in-Chief

Prof. Dr. Cate Macinnis-Ng

Department of Biological Sciences, Faculty of Science, University of Auckland, Private Bag 92019, Auckland 1142, New Zealand

Prof. Dr. Giacomo Alessandro Gerosa

Department of Mathematics and Physics, Catholic University of Brescia, I-25121 Brescia, Italy

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
