Message from the Guest Editors

This Special Issue of *Forests* covers research on the conservation and restoration of Mediterranean oak forests and the ecosystem services they generate, including supporting services such as biodiversity conservation; regulation services such as soil protection, water regulation, or carbon sequestration; provisioning services such as cork production and livestock production; and cultural services such as recreational activities. It also welcomes studies that assess, quantify, and map ecosystem services, in order to help to promote the conservation and restoration of Mediterranean oak forests.

Keywords

- sustainable forest management
- forest restoration
- land use change
- oak regeneration
- oak plantation
- oak decline
- grazing
- browsing
- wildfires
- pests and diseases

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
