# **Message from the Guest Editor**

This Special Issue aims at presenting new or improved versions of resources that allow better modeling and understanding the dynamics of forest and agroforest ecosystems biomass and carbon pools, while discussing implications on forest and agroforestry areas management.

Considering the geographical scope of the Special Issue, papers focusing on different spatial levels will be accepted, ranging from the plot to the regional scales. Balance among countries and regions will also be considered as one of the objectives of this Special Issue.
