Deadline for manuscript submissions:

31 October 2024

Message from the Guest Editors

Mangrove forests are highly productive and biologically significant ecosystems that provide a wide range of goods and services to society. Compared with other ecosystems, mangrove ecosystems have a much higher capacity for carbon sequestration and storage. Climate change, primarily driven by human activities, is occurring globally and poses significant threats to both humans and natural ecosystems. The carbon captured by mangrove ecosystems can help mitigate anthropocentric CO₂ emissions, making them crucial in addressing climate change and achieving sustainable development goals (SDGs). However, widespread deforestation and degradation have severely impacted mangroves. Since the 1980s, around 50% of the world's mangrove forests have been lost, putting them at great risk. Therefore, urgent action is needed to protect and restore mangroves globally. This Special Issue aims to explore the impacts of mangrove ecosystems on coastal ecology and climate change, providing scientific support for conservation efforts and the future development of coastal areas.

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
