Message from the Guest Editors

Green areas, including forests and urban forests, play a crucial role in the well-being of residents, serving as spaces for diverse activities that foster social cohesion. Interdisciplinary research highlights the link between physical activity, quality of life, and forests. Designing sustainable urban areas with accessible forests is crucial for the health and development of cities. Shaping urban forests stimulates the senses, positively impacting health. Research focuses on identifying forest infrastructure elements that support physical activity and spending time outdoors, which is crucial for preventive public health measures. This Special Issue aims to present the latest advancements in research on people's interaction with forests and their impact on well-being. It also focuses on providing selected contributions regarding forest management and forest economy planning, taking into account the expectations of external stakeholders.

Potential topics include, but are not limited to, the following:

- Forest utilization;
- Recreation and leisure development;
- Urban forests;
- Forests and well-being;
- Forest recreation preferences;
- Urban forest utilization;

forests

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q2 (Forestry) / CiteScore - Q1 (Forestry)
