Message from the Guest Editors

In this Special Issue of *Forests*, we focus on the interface between forest management and silviculture and forest pathology. We welcome original studies and critical reviews focusing on diseases and risks of diseases in managed forests. All stages of pathogen invasions and relevant interventions, as well as ecological, physiological and genetic studies with links to management practices are of interest. Relevant topics include but are not restricted to:

- management of risks and damage due to invasive pathogens;
- forest restoration and regeneration in stands affected by native or alien pathogens;
- pros and cons of new forest management regimes for forest health;
- new methods to control forest diseases and their integration to management regimes.

Message from the Editorial Board

Forests (ISSN 1999-4907) is an international and cross-disciplinary, scholarly forestry journal. The distinguished editorial board and refereeing process ensures the highest degree of scientific rigor and review of all published articles. Original research articles and timely reviews are released online, with unlimited free access.

Our goal is to have *Forests* be recognized as one of the foremost publication outlets for high quality, leading edge research in this broad and diverse field. We therefore invite you to be one of our authors, and in doing so share your important research findings with the global forestry community.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), Ei Compendex, GEOBASE, PubAg, AGRIS, PaperChem, and other databases.

Journal Rank: JCR - Q1 (Forestry) / CiteScore - Q1 (Forestry)
